

UCSC Storm Water Management Program

Help UCSC to manage the quality of campus storm water!

Needed: Writers, artists, web gurus, marketing specialists, photographers, students interested in environmental issues, & people able to network easily to work on storm water issues to enhance the overall campus environment!

No experience with storm water necessary; minimum 5-unit internship commitment.

Potential projects include, but are not limited to:

- Web page content development
- Informational brochure development
- Storm Drain Marking Program
- Creation of a photo library
- Development and implementation of publicity campaigns
- Outreach programs
- Research, view, and implementation of storm water design elements for sustainable campus development
